Australia's Premium Salt Lamp Supplier

### **Why Himalayan Salt Lamps are a great investment for your Health**

Are you always allergic? How many static electric types of machinery do you have aside from the ones that you have at work? Are you working most of the time with fluorescent lamps? Are you one of the many who work in front of the computer the whole day? Then you know that the majority of the electrical equipment generate positive ions known as electric smog, or more commonly called radiation.

Our world is surrounded by devices that allow us to work faster and more efficiently, but is it causing us to get sick and have a multitude of problems along the way? As this radiation or smog deteriorates the cleanliness of our air, it lessens the quality of air we take in into our body which affects our physical and emotional state.

Himalayan Salt lamps come to the fore where they generate negative ions thus producing a balanced space, by converting positive ions into neutral clean air. Many people have found that after they have continuously used Himalayan salt lamps in their homes they have felt much more relaxed, less stressed and breathe more easily. Using these lamps can be a big conversation starter as they are very unique with family and friends taking notice and will mention their beauty and luminous glow.

There have been scientific studies that have backed up the claims of many satisfied salt lamp owners of the wonderful effects of the Himalayan Salt lamps to their health. Salt lamps come in simple varied sizes, easy to clean and are maintenance free.
